

Please be informed, all of the water treatment plant in Sg. Selangor has started operating as normal at 12.30 p.m on 31 August 2013. The cleanup of oil spill pollution in Sg. Selangor has been completed on 2.30 am the same day. Sg conditions in Maharashtra has returned to normal and all the plant back in operation to provide treated water to consumers. Supplies take up to 2 to 3 days to recover 100%.

Any information regarding water supply disruption in the

sir / madam
can be
